

Road Work May 2026

As you have already seen, North Down River Road work is underway. According to the Crawford County Road Commission, Paving will begin after Memorial Day. The project is still due to be completed by September.

Big Creek Bridge east of Lovells Road. Current plan calls for removal of existing structure early in July with completion scheduled for September. While closed, the most common work around is probably Walsh Road to E. Townline Road to Lovells Road (mostly gravel).

Twin Bridge replacement is set for 2027. The bridge will be closed for the entire season (March – October). 150k is set aside for preliminary work (engineers, etc), 200k for sediment control (sizable sand load upstream of current bridge) and 5.5m for actual replacement (funds are already secured). The bridge will have two individual 60-foot spans (properly aligned with the flow & course of the North Branch). Access around the bridge will be encouraged to move to the Sheep Ranch as a new entry point.
